Mathematics and Computers in Simulation 44 (1998) 599–601

MATHEMATICS AND COMPUTERS IN SIMULATION

Author index of volume 44 (1998)

(The issue number is given in front of the page number)

Albrecht, A., S.K. Cheung, K.S. Leung and **C.K. Wong,** Computing elastic moduli of two-dimensional random networks of rigid and nonrigid bonds by simulated annealing (2) 187–215
Andress, T. H., *see* **L'Ecuyer, P.** (1) 99–107
Aracil, J., E. Ponce and **L. Pizarro,** Behavior patterns of logistic models with a delay (2) 123–141
Bees, M. A., I. Mezic and **J. McGlade,** Planktonic interactions and chaotic advection in Langmuir circulation (6) 527–544
Béreaux, Y. and **J. Clermont,** Numerical simulation of two-and three-dimensional complex flows of viscoelastic fluids using the stream-tube method (4) 387–400
Besançon, G. and **G. Bornard,** Symbolic computation in nonlinear control systems analysis: The example of bilinearization (1) 11–27
Bischi, G., L. Stefanini and **L. Gardini,** Synchronization, intermittency and critical curves in a duopoly game (6) 559–585
Bornard, G., *see* **Besançon, G.** (1) 11–27
Bozinovski, S., *see* **Stojanov, G.** (3) 295–310
Castillo, J. E., and **James S. Otto,** A generalized length strategy for direct optimization in planar grid generation (5) 441–456
Čerić, V., Preface (3) 231
Čerić, V., Visual interactive modeling and simulation as a decision support in railway transport logistic operations (3) 251–261
Chen, C., *see* **Wu, T.** (2) 155–162
Cheung, S.K., *see* **Albrecht, A.** (2) 187–215
Clermont, J., *see* **Béreaux, Y.** (4) 387–400
Deville, M.O., Foreword (4) 311
Diamond, P., P.E. Kloeden, V.S. Kozyakin and **A.V. Pokrovskii,** A model for round off and collapse in computation of chaotic dynamical systems (2) 163–185
Drashansky, T., *see* **Joshi, A.** (1) 43–59
Feldman, P., A. Muni and **G. Swindle,** An optimal termination testing procedure for discrete event simulations (1) 81–98
Formaggia, L., A. Scheinine and **A. Quarteroni,** A numerical investigation of Schwarz domain decomposition techniques for ellipitic problems on unstructured grids (4) 313–330
Fung, K.K., and **S.Y.R. Hui,** Duality of transmission line models for simulation of reactive circuit components (2) 143–154
Garcia, J. J. R., Erratum to "Integrating functional programming and symbolic computation" [Math. Comp. Simul. 42 (1996) 467–473] (5) 505–511

Gardini, L., *see* **Bischi, G.** (6) 559–585
Gatski, T. B., Prediction of complex flow fields using higher-order turbulent closures (4) 331–345
Georgiev, Tz., **Al. Ratkov** and **St. Tzonkov**, Mathematical modelling of fed-batch fermentation processes for amino acid production (3) 271–285
Golenko-Ginzburg, D. and **A. Gonik**, Job-shop resource scheduling via simulating random operations (5) 427–440
Gonik, A., *see* **Golenko-Ginzburg, D.** (5) 427–440
Gurlebeck, K., *see* **Sprössig, W.** (4) 401–413
Halkias, C.C., *see* **Papaodysseus, C.** (1) 29–41
Houstis, E., *see* **Joshi, A.** (1) 43–59
Hsiao, C., State analysis of linear time delayed systems via Haar wavelets (5) 457–470
Hui, S.Y.R., *see* **Fung, K.K.** (2) 143–154
Joshi, A., **T. Drashansky, J. Rice, S. Weerawarana** and **E. Houstis**, Multi-agent simulation of complex heterogeneous models in scientific computing (1) 43–59
Kapuscinski, C.A., *see* **McKenzie, C.R.** (1) 1–9
Kassels, C.G.M., *see* **Wesseling, P.** (4) 369–385
Keeping, B.R. and **C.C. Pantelides**, A distributed memory parallel algorithm for the efficient computation of sensitivities of differential-algebraic systems (6) 545–558
Kloeden, P.E., *see* **Diamond, P.** (2) 163–185
Koukoutsis, E., *see* **Halkias, C. C.** (1) 29–41
Kozyakin, V.S., *see* **Diamond, P.** (2) 163–185
Kurtanjek, Z., Principal component analysis of bioreactor fed-batch operation by computer simulation (3) 287–294
Kuruganti, I. and **S. Strickland**, Optimal importance sampling for Markovian systems with applications to tandem queues (1) 61–79
L'Ecuyer, P. and **T. H. Andress**, A random number generator based on the combination of four LCGs (1) 99–107
Leung, K.S., *see* **Albrecht, A.** (2) 187–215
Mackevičius, V., Convergence rate of Euler scheme for stochastic differential equations: Functionals of solutions
McGlade, J., *see* **Bees, M. A.** (6) 527–544
McKenzie, C.R. and **C.A. Kapuscinski**, Estimation in a linear model with serially correlated errors when observations are missing (1) 1–9
Mezic, I., *see* **Bees, M. A.** (6) 527–544
Muni, A. *see* **Feldman, P.** (1) 81–98
Nicholls, M.G., *see* **Rodrigo, R. D.** (6) 587–597
Nordling, P. and **A. Sjo**, Parallel solution of modular ODEs with application to rolling bearing dynamics (5) 495–504
Otto, J., **M. Paraschivoiu, S. Yeşilyurt** and **A. T. Patera**, Bayesian-validated computer simulation surrogates for optimization and design: Error estimates and applications (4) 347–367
Otto, J. S., *see* **Castillo, J. E.**, (5) 441–456
Pantelides, C.C., *see* **Keeping, B.R.** (6) 545–558
Papaodysseus, C., **E. Koukoutsis, G. Stavrakakis** and **C.C. Halkias**, Exact analysis of the finite precision error generation and propagation in the FAEST and the fast transversal algorithms: A general methodology for developing robust RLS schemes (1) 29–41
Paraschivoiu, M., *see* **Otto, J.** (4) 347–367
Patera, A.T., *see* **Otto, J.** (4) 347–367

Penzar, D., *see* **Slamic, M.** (3) 263–269
Penzar, I., *see* **Slamic, M.** (3) 263–269
Pokrovskii, A.V., *see* **Diamond, P.** (2) 163–185
Ponce, E., *see* **Aracil, J.** (2) 123–141
Quarteroni, A., *see* **Formaggia, L.** (4) 313–330
Ratkov, Al., *see* **Georgiev, T.** (3) 271–285
Rice, J., *see* **Joshi, A.** (1) 43–59
Rodrigo, R. D. and **M. G. Nicholls**, Modelling real world industrial systems: an interdisciplinary approach based on petri nets (6) 587–597
Sanders, J. A. and **J. P. Wang**, Classification of conservation laws for KdV-like equations (5) 471–481
Sanders, J. A. and **J. P. Wang**, Hodge decomposition and conservation laws (5) 483–493
Sargent, R.G., Modeling queueing systems using hierarchical control flow graph models (3) 233–249
Scheinine, A., *see* **Formaggia, L.** (4) 313–330
Sjo, A., *see* **Nordling, P.** (5) 495–504
Segal, A., *see* **Wesseling, P.** (4) 369–385
Slamic, M., **I. Penzar**, **D. Penzar** and **J. Stjepanovic**, Fixed-viewpoint representation of synthetic environment for the low-cost industrial and military simulators (3) 263–269
Sprössig, W. and **K. Gürlebeck**, On the treatment of fluid problems by methods of Clifford analysis
Stavrakakis, G., *see* **Papaodysseus, C.** (1) 29–41
Stefanini, L., *see* **Bischi, G.** (6) 559–585
Stjepanovic, J., *see* **Slamic, M.** (3) 263–269
Stojanov, G., **S. Bozinovski** and **G. Trajkovski**, Interactionist-expectative view on agency and learning (3) 295–30
Strickland, S., *see* **Kuruganti, I.** (1) 61–79
Swindle, G., *see* **Feldman, P.** (1) 81–98
Trajkovski, G., *see* **Stojanov, G.** (3) 295–30
Tong, R.P., A new approach to modelling an unsteady free surface in boundary integral methods with application to bubble-structure interactions (4) 45–426
Tzonkov, St., *see* **Georgiev, T.** (3) 27–285
Wang, J.P., *see* **Sanders, J. A.** (5) 47–48
Wang, J.P., *see* **Sanders, J. A.** (5) 483–493
Weerawarana, S., *see* **Joshi, A.** (1) 43–59
Wesseling, P., **M. Zijlema**, **A. Segal** and **C.G.M. Kassels**, Computation of turbulent flow in general domains (4) 369–385
Wong, C.K., *see* **Albrecht, A.** (2) 87–25
Wu, T. and **C. Chen**, Closed form synthesis of planar and spatial linkages function generation with symbolic representation (2) 55–62
Yeşilyurt, S., *see* **Otto, J.** (4) 347–367
Zijlema, M., *see* **Wesseling, P.** (4) 369–385
